At a time of economic difficulty, lender flexibility and communication is vital. The industry must also ensure there are viable exit paths to reduce loan defaults.
At a time of economic difficulty, lender flexibility and communication is vital. The industry must also ensure there are viable exit paths to reduce loan defaults.

Rising interest rates have restricted the availability of mainstream finance to certain sectors. Although this has boosted the appeal of bridging finance, the wider economic environment means there must be viable exit strategies in place – especially if the economic situation does not improve over the foreseeable.
