- Energy drink consumption by type and frequency of consumption
- Energy drink purchase locations
- Change in energy drink consumption and reasons for change
- Important factors when purchasing energy drinks
- Interest in energy drink claims
- Energy drink attitudes and behaviors
- State of the energy drink market

Energy drinks continue to see strong growth, particularly due to consumer interest in increased productivity and functional and health-forward innovation.

Overview

The energy drink market has experienced healthy growth, driven by a solid base of loyal consumers and new consumers attracted by BFY options and innovative flavors and formats. This momentum is expected to propel sales to reach \$30 billion by 2028. The category is evolving with a heightened focus on fitness and natural ingredients, capturing new consumers and consumption occasions centered around health and lifestyle.

Energy drink consumption is highly routine, with nearly half of consumers drinking them multiple times per week, indicating a strong foundation and potential for expanding usage occasions and dayparts as beverage types and functionalities continue to blur and borrow from each other.
