

NUTRACEUTICALS: VITAMINS, MINERALS & SUPPLEMENTS – INDIA – 2023

Boost usage of VMS by positioning products that support healthy ageing and mental wellbeing. Offer enhanced/easy absorption to showcase efficacy.

Anamika Banerji,
Research Analyst - Food
and Drink, India

Nutraceuticals: Vitamins, Minerals & Supplements - India - 2023

This report looks at the following areas:

- Usage of vitamins, minerals and supplements (VMS) and potential to grow in the Indian market
- Opportunity to position VMS products as an aid to healthy ageing; age-wise outlook towards healthy ageing; health priorities of consumers who want to delay ageing
- Health benefits of interest; opportunity to tap into the interest in the mental wellness space; weight loss and brain health as emerging areas of interest
- Factors that motivate consumers to choose one VMS product over another in the crowded space
- Potential to personalise VMS – target audience, drivers
- Classification of consumers into wellness segments based on wellness-related activities; positioning VMS as per the needs of different segments

Boost usage of VMS by positioning products that support healthy ageing and mental wellbeing. Offer enhanced/easy absorption to showcase efficacy.

Overview

The need for VMS is evolving, from being majorly driven by doctors' prescriptions to being solutions that consumers proactively seek for preventive healthcare and healthy ageing. The usage of VMS has remained stable over the last one year and is likely to grow as almost a quarter of VMS users express their intention to spend more on the category in the next year.

MINTEL

Positive ageing or healthy ageing is relevant not only for seniors but also for the youth. The VMS category is well placed to offer solutions for improving quality of life for seniors and to kickstart the early prevention of age-related diseases with positive nutrition from a young age. Mental wellbeing and protection of vital organs can be two key areas of focus for innovations in healthy ageing.

Energy and immunity are top health priorities of consumers, closely followed by mental wellbeing and digestive health. Time is ripe to bolster innovation in the mental wellness space, with **67%** of Indians strongly agreeing that maintaining good mental health is key to overall wellbeing.

Choosing a product in the crowded space is a challenge for consumers. The report throws light on the top features that can motivate consumers to pick one product over another. Moreover, the interest and willingness to pay a premium for personalised offerings is discussed.

Based on wellness-related behaviours, consumers are classified into three wellness segments. The opportunities to position VMS products for these segments are highlighted in the report.

- Metro dwellers are more likely to turn to VMS for aid in weight management
 - Graph 35: 'aid in weight loss' as a health benefit of interest in health supplements, by city tier, 2023
- Launches have remained stable over the last three years; green tea extract is a commonly used ingredient
 - Graph 36: % launches with select ingredients in VMS launches featuring the slimming claim, 2022-23
 - Graph 37: % of VMS launches featuring the slimming claim, 2018-23
- South Korea is the global leader for slimming supplements
 - Graph 38: % share of VMS launches featuring the slimming claim, by market, 2022-23
- Support consumers in their weight loss journey
- Leverage the power of probiotics for weight control
- Differentiate with slimming supplements designed specifically for women
- Consumers begin to see merit in supplements for brain and heart health
 - Graph 39: 'improve brain cognition/performance' as a health benefit of interest in health supplements, 2023
 - Graph 40: 'improve cardiovascular health' as a health benefit of interest in health supplements, 2023
- Consumers begin to see merit in supplements for brain and heart health
- Lend support to improve brain performance
- Offer solutions to maintain normal functioning of the heart

How consumers choose VMS products

- Choosing a product in the crowded space is a challenge for consumers
 - Graph 41: agreement with the statement "It is difficult to understand the differences between supplements offering similar health benefits", 2023
- The majority put their faith in supplements from well-known brands
 - Graph 42: features that would encourage consumers to choose one product over another, 2023
- Lesser-known brands can leverage interest in special offers and attractive packaging
 - Graph 43: features that would encourage consumers to choose one product over another, 2023
- Communication around superior absorption can prove efficacy
 - Graph 44: features that would encourage consumers to choose one product over another, 2023

- Talk about easier and enhanced absorption of active ingredients
- Case Study: Wellbeing Nutrition demonstrates improved delivery/absorption due to advanced molecular science
- Metro consumers make the target audience for novel formats/flavours
 - Graph 45: features that would encourage consumers to choose one product over another, 2023
- Intrigue consumers with novel and convenient formats
- Offer formats that can be had along with food
- Differentiate with novel flavours

Potential to personalise VMS

- VMS users are warming up to the idea of personalised offerings
 - Graph 46: agreement with select statements about VMS, 2023
- Well-to-do and upper city tier consumers are willing to pay a premium for personalisation
 - Graph 47: willingness to pay more for personalised supplements, 2023
- The need for nutrition counselling and scepticism about effectiveness are key drivers
- Tech solutions boost personalised nutrition
- Help consumers acknowledge their unique needs
- Create a healthy, nutrition-conscious community
- Personalised offerings can make a place in the category by promising greater efficacy
 - Graph 48: agreement with select statements about VMS, 2023
- Communicate greater efficacy and flexibility
- Engage with consumers via tracking apps
- Personalisation can play a key role in managing existing health issues
- Gut microbiome profiling can uncover root causes of a wide range of health issues
- Explain how personalised supplements give better results in tackling health issues

Positioning VMS for different wellness segments

- Indian consumers can be classified into three major segments based on efforts to manage health and wellbeing
- Introducing the three wellness-based segments
- Activity profile of the three consumer segments
- VMS consumption is higher among the Moderate and High Wellness segments
 - Graph 49: usage of VMS, by wellness segments, 2023
- Mental wellbeing is valued by consumers with advanced wellness behaviours
- Preventive healthcare is a priority for all the wellness segments; High Wellness Achievers focus on improving physical appearance via VMS
- Support High Wellness Seekers in improving physical appearance
- Target the wellness-evolved consumers for personalised offerings
 - Graph 50: agreement with select statements about VMS, by wellness segments, 2023

APPENDIX

- Methodology for consumer segmentation

About Mintel India Consumer

Access our reports now and we'll tell you how major trends are affecting India. We also hone in on the regional differences from socio-economic groups to demographics such as age, gender and household composition. We research consumers in Metro and Tier 1 to 3 cities across the 4 main regions and in 6 local languages.

In each report, we're analysing the trends and the innovations, the behaviours and the influencers of consumers across India. Our local expert analysts then examining the primary research and consumer data and translating it into what it means for you.

- ✓ Find out what Indian consumers want, what they need and what influences their purchasing decisions.
- ✓ Understand the Indian market and see how it fits into wider trends on a local and global level.
- ✓ Take advantage of the gaps and opportunities that exist today, tomorrow and beyond.

How Mintel Indian Consumer will help your business grow:

01

Segment consumers across India according to their regional and demographic differences so you can target them more effectively.

02

Analyse the latest trends and innovations and see how they fit at a local level to identify opportunities for your next big idea.

03

See action-oriented summaries to understand an area quickly or investigate the data to get an in-depth understanding of your market.
