Media and Technology

Social Media: News - UK - 2023

This report looks at the following areas:

- Trends in usage of major social media platforms.
- Interest in potential features to tackle misinformation.
- How people respond to news content on social media.
- Preferred types of content from news organisations on social media.
- Opportunities and concerns regarding the use of AI for news on social media.

Generative AI presents new challenges for social media platforms looking to limit misinformation. However, the technology also provides opportunities to engage users

Overview

Improvements in the economic environment and consumer financial confidence is being reflected in growth in advertising revenue across social media platforms. People's willingness to spend more will boost the uptake of the new paid features that are being incorporated into social media.
